## **APPENDIX 2**

The preferred candidate is required to complete a Pre-Employment Health Questionnaire. The table below outlines the tests to be carried out - depending on the nature of the position applied for.

<b>Condition</b>	<b>Information to include in Position Description</b>
COVID-19	Te Whatu Ora staff must have completed their primary course of NZ approved COVID-19 vaccines as they have direct contact with patients and members of the public
TB Active	No person with active pulmonary or laryngeal tuberculosis (TB) is allowed to be at work in Te Whatu Ora
TB Latent	Staff who expect to have contact with patients or infectious materials must have assessment of previous TB exposure at the time of employment
BBV	No person who is susceptible to hepatitis B is allowed to have contact with patients or human materials (e.g., blood) unless they have taken part or agree to take part in a blood-borne virus education, prevention and vaccination program
MRSA	No person colonised or infected with methicillin-resistant <i>Staphylococcus aureus</i> (MRSA) is allowed to work in clinical areas <sup>1</sup> New staff who will be working in clinical areas should be screened for MRSA if they have: <ul style="list-style-type: none"><li>• a chronic skin condition</li><li>• been working in an overseas healthcare facility in the last year</li><li>• been MRSA-positive in the last year</li></ul>
Skin	No person with a skin condition that by virtue of its site and type could be an infection risk is allowed to have contact with patients, food, microbiology samples or sterile items
Measles/Rubella	No person who is susceptible to measles or rubella is allowed to have contact with pregnant women.
VZV	No person susceptible to varicella-zoster virus (chickenpox) is allowed to have contact with newborn babies or pregnant women
